# Top Technology, Best Clean WORLD

As the industry that has kept the happiness and health for the human beings through a clean and hygienic environment, it will continue R&D and stay with the customers.

## World Business

Based on the know-how that has been accumulated with a long history, Tokyo Electron has exported its world-widely certified quality products to the 50 countries.

Harmonized our technology with customer's demand,  
Multifunctional Hand Dryer - **AIR TOWEL**

## KTM Series

### Hygienic suggestion of drying your hands at high- speed after washing

Drying your hands at high speed after washing is a new habit for clean and smart modern people. High power Air Towel quickly dries your hands, fingers and wrists with powerful warm wind and ventilator for the speed of 140m/sec. This is perfect for various locations such as restaurants, hotels and public facilities, etc. We recommend installing a sterilizing light and ozone lamp on Air Towel for the use of hygiene related facilities.

**Super slim design**

Maximum wind speed : **140m/sec**

Flat-surfaced water container makes **cleaning easier**

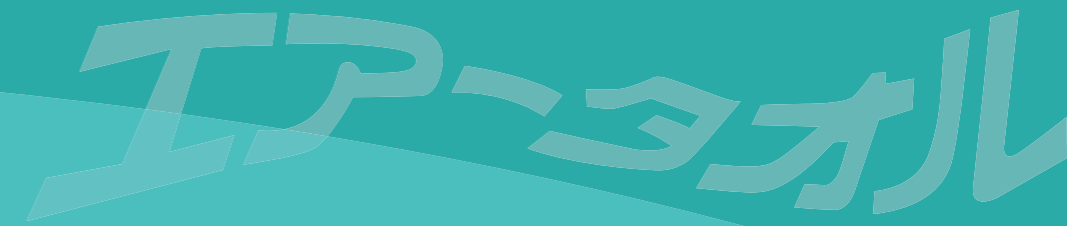

Material of the body : **Nonflammable ABS and antibacterial material** used

**Burglarproof system installed**

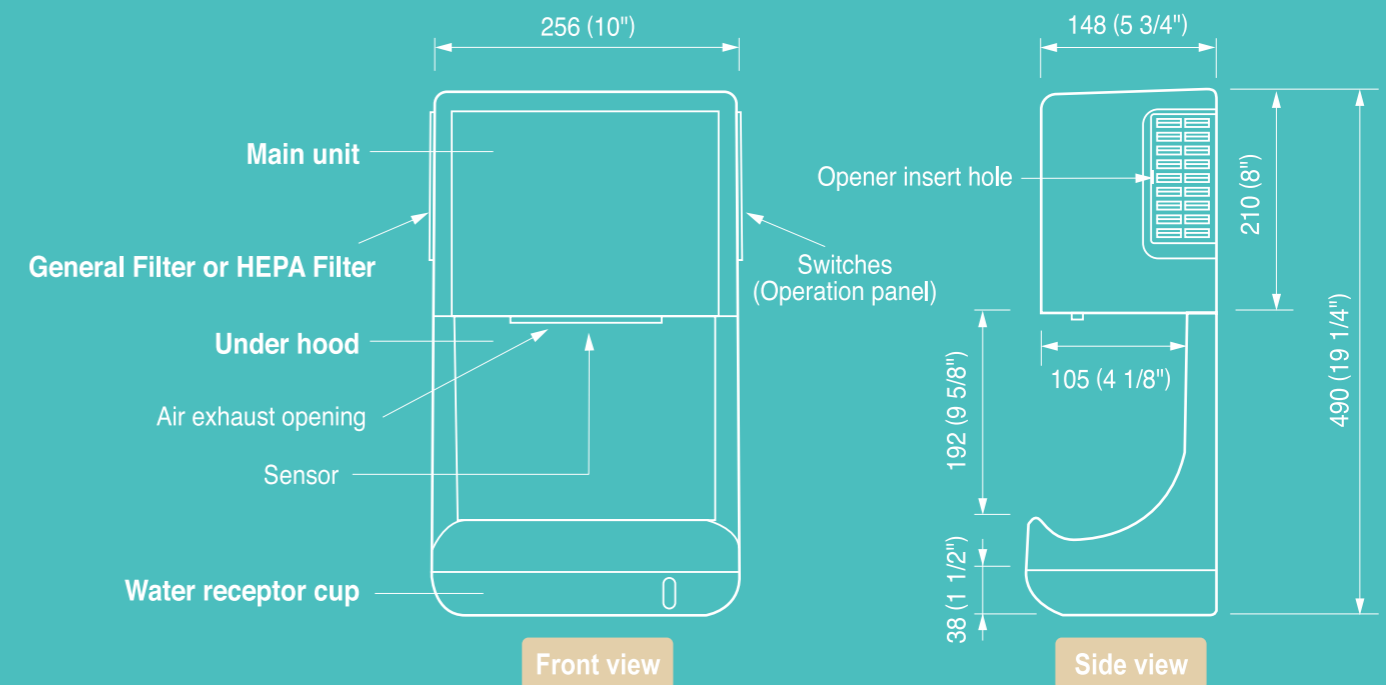

**Auto door interlocking** with Air Towel installed

## Pure Hygiene®

made by the 50 years history of technologies

### Specifications unit : mm

**Name and structure** Purehygen PH-01/PH-02 (automatic door, air towel KTM series compatible)

**Material** ABS white color **Optimal** Temperature 5~40°C, Humidity 20-80% **Weight** 1.4kg (except the battery and the empty vessel)

**Power** Four alkaline batteries (Type D 1.5V), AC power adapter DC 6V (sold separately), Batteries included are just for testing.

### As the Automatic

It gives the convenience of Purehyglene most advanced technology, spraying the anti-septic solution automatically when a sensor is touched by a hand.

**Sensor**

No need to touch a pump as the sensor sprays the anti-septic solution by detecting a hand.

**Safety switch**

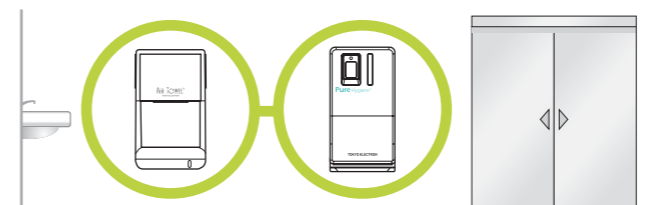

It is designed to turn off the switch automatically when the cover is opened.

**Indication lamp**

The green light is turned on when the sensor detects and the red light blinks when the battery has run out.

### As an Interlocked

The most advanced dual system contributing to the hygienic environment  
The interlocked system of Purehygen and air towel
