The world is now paying attention to LeeBongSun Yakdoraji

America, Canada, South America, Japan, Vietnam, Malaysia...

LeeBongSun Yakdoraji that has emerged as a superfoods

The representative brand of Yakdoraji in Korea, "Handoraji," at "2020 TJB Vietnam Business Matching Day"

It signed a \$1,000,000 one-year export contract with Liga Doctor Clinic in Vietnam.

「Liga Doctor Clinic」 is the company that supplies products to 9,000 stores specializing in beauty spar in Vietnam.

LeeBongSun Yakdoraji, which has proven to be effective in enhancing respiratory health and immunity, is being exported to New York, Vietnam, Canada, South America, Japan and Malaysia.

Platycodin D (Platycodin D), a saponin active ingredient in LeeBongSun Yakdoraji, has recently been studied as a preventive and therapeutic component of Corona19.

LeeBongSun Yakdoraji has emerged as a superfood of the world.

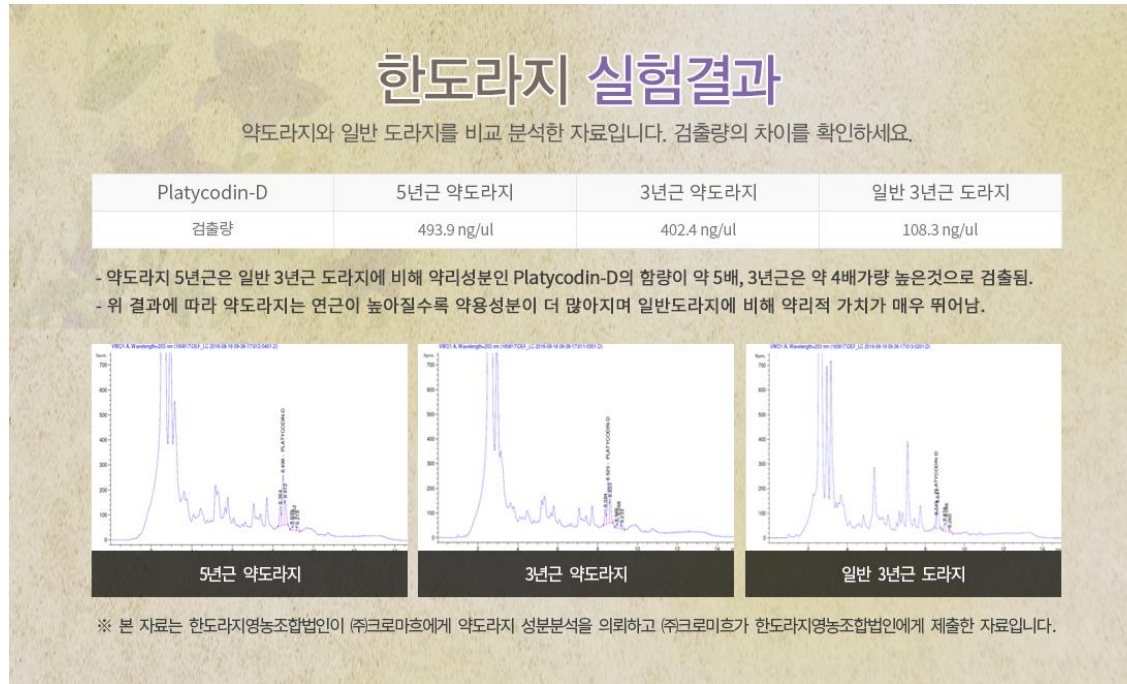

**For the health of mankind
to do a great job
Janghan Doraji
apply for variety protection**

Unlike ordinary bellflower roots, Lee Bong-sun's yakdoji is characterized by a large brain head and much more small roots, and above all, Yakdoraji contains four to five times more Platycodin D.

Among the saponin ingredients of Yakdoraji, Platycodin D is a valuable substance that the Rural Development Administration is also studying as a next-generation functional effective ingredient.

In the Korea natural bio-research industry, Platycodin D is studying the effects of inhibiting the growth of the corona19 virus.

LeeBongSun Yakdoraji contains four to five times more Platycodin D.

In oriental medicine, Yakdoraji are widely known for their excellent effect on bronchial and respiratory health by relieving cough, phlegm and inflammation.

In modern studies, Yakdoraji also increase the activity of NK cells and the proliferation of immune-related cells.

It turned out to strengthen immunity.

Platycodin D of yakdoraji is effective for anti-inflammatory, diabetes prevention, liver health, and immune enhancement.

KTV_Return to Farming_Super Yakdoraji is up! As YouTube videos have surpassed 190,000 views, orders for Lee Bong-sun's Yakdoji have been placed not only in Korea but also overseas Koreans. You can watch the video by typing " 한도라지 귀농 " on YouTube.

Vision of Handoraji

Recently, the number of patients with various respiratory diseases, including bronchial and asthma caused by fine dust, has been on the rise. Since ancient times, balloon flower roots have been used as a leading drug in Oriental medicine for respiratory treatment. Oriental medicine has stressed that old balloon flower roots are better than wild ginseng. The Rural Development Administration also said balloon flower roots have richer crude saponin content than ginseng.

The balloon flower roots is loved for food and side dishes. But there is a very big difference between food and medicine.

Distinguish between the general balloon flower roots and mountain balloon flower roots, and for food and medicine.

1. Common balloon flower roots

Collect the seeds of the balloon flower roots and grow them in the farmhouse.

2. Mountain balloon flower roots

It has grown in the mountains since ancient times, have grown for a long time and are used as medicine.

3. Food-eating balloon flower roots

The seeds are improved to be grown in farming households and mass-produced. It grow and sell for one to two years.

4. Medicinal(herbal) balloon flower roots

It has been called Gil-kyung(길경[桔梗]-*Platycodon grandiflorum* A. De Candolle) in Oriental medicine since ancient times. In the past, mountain balloon flower roots were collected and used, and now superior seed are selected and cultivated for medicinal purposes.

In conclusion, the food-eating balloon flower roots is very weak in medicine. But the medicine-eating balloon flower roots have excellent medicinal properties.

Handoraji have our own medicinal balloon flower roots seeds. We also produce the best medicinal balloon flower roots through direct cultivation and operation of the woodcutters. Compared to 3-year common balloon flower root, 5-year herbal balloon flower root contains about 5 times, and 3-year herbal balloon flower root contains about 4 times more Platycodin-D. As air pollution has become serious lately, Handoraji is gaining worldwide attention as a must-have health food.

LeeBongSun Yakdoraji 「Janghan balloon flower」, which was applied for protection of the variety of Yakdoraji. cultivated directly by original natural circulation farming method.

The high-quality products of LeeBongSun Yakdoraji are completed through a safe production process that can be trusted with the best raw materials.

In Chun Baek, legendary baseball player became a fan of LeeBongSun Yakdoraji

In Chun Baek, the immortal fourth batter, was amazed at the medicinal effect of LeeBongSun Yakdoraji.

Baek In-cheon is a legendary player in Korean and Japanese professional baseball. Baek In-cheon, who played as a manager and a player, had batting average .412 for the MBC Blue dragons in 1982. He was 40 years old at that time.

This year, Baek became 77 years old. He had a bad bronchial tube, so he choked, coughed and phlegm came out in the morning.

Then, Baek's acquaintance suggested LeeBongSun Yakdoraji. The symptoms disappeared in two days after taking LeeBongSun Yakdoraji. Baek made a thank-you call to Lee, LeeBongSun Yakdoraji Handoraji Farming Association Corporation CEO. Baek volunteered as a goodwill ambassador for LeeBongSun Yakdoraji.

Baek said, "Breathing is the most important thing to be healthy. It is hard to breathe because of air pollution these days. Under these circumstances, LeeBongSun Yakdoraji will have an excellent effect on respiratory health. I sincerely hope that many people around the world will eat

Handoraji \$3.5 million export contract to the U.S. & Japan

New York Ilbo Report

The screenshot shows the New York Ilbo website with a news article titled "대한민국 대표 한도라지 美·日 350만달러 수출계약 체결" (Korea's representative Handoraji signs \$35 million export contract with US and Japan). The article text includes:

사과로 유명한 고장 예산군에서 특종작물 한도라지가 대규모 수출 성공으로 주목받고 있다. 지난 3월28일, 충청남도 예산군의 한도라지영농조합법인인 예산군청 대회의실에서 미국 KHFC CORP와 150만 달러, 일본 BARA CO.,LTD와 200만불 규모로 한도라지 농축액상과 농축과립스틱 수출계약을 체결했다.

한도라지는 뿌리를 중심으로 한류제품 수출 성공로드맵을 제공하는 KEP(KEP, KOREA EXPORT PLATFORM, www.kep.kr)의 성공 작품이다. 세계 시장에서 한류를 전파하고 히트시키는 인물추천서는 750만 재외한인이 중심이다. 1세대, 2세대의 한인들이 한상(韓商)으로 수출길을 만들었고, 3세대, 4세대의 젊은 한인들이 SNS를 통한 한류메이커의 역할을 하고 있는데, KEP은 뿌리주신문인협회 회장서 뉴욕일보를 중심으로 세계한인언론사 네트워크를 활용하여 한국우수상품의 해외진출의 테스트마켓부터 전시회, 인포모션판매광고, 홈쇼핑방송 등 효율적인 수출로드맵을 제공하고 있다.

한도라지는 2017년, 2018년 미중부추석대전지 대한민국뉴욕산업박람회 참가하여 현지 한인분 아니 라 중국계, 멕시코계, 백인계 등 다양한 인종으로부터 호평을 얻으면서 이번 수출의 결실을 맺게 됐다. 대한민국뉴욕산업박람회 참가 후, KEP과 같은 신뢰로 수출프로젝트를 밀착 협업할 팀력이 성공의 원동력이 되어, 미국, 일본 수출의 궤거를 거두었다.

충남 예산군 상교의 비옥한 활토에서 자란 한도라지(www.handoraji.com)는 식용 도라지를 3년 정도 키워 쓰는 시용의 약도라지와는 달리 재래종 특용약도라지 최고급품종으로 일반도라지에 비해 약 5배 높은 사포닌 함량으로 날다른 유효성을 인정받고 있다.

Below the text are three small images showing different stages or parts of the Handoraji root: "일반도라지", "한도라지", and "한도라지".

The special crop in Yesan-gun, Handoraji has succeeded in exporting on a large scale. Handoraji signed the export contract of \$1.5 million with an American company KHFC CORP and \$2 million with a Japanese company BARA CO.,LTD.

LeeBongSun Yakdoraji herbal balloon flower root grows on fertile yellow soil in South Chungcheong Province. Compared to the common balloon flower root on the market, LeeBongSun Yakdoraji herbal balloon flower root contains five times more saponin (platycodin, platycoside, etc), which is known for its anti-cancer and anti-inflammatory properties. As an alkalizing health food, LeeBongSun Yakdoraji balloon flower root also contains plenty of Vitamin A, Vitamin C, calcium, iron, minerals, and fiber.

As other manufacturers utilize a steam cooking method, LeeBongSun Yakdoraji takes a page out of the book of Korean Traditional Medicine to follow a low-temperature decoction method that preserves not only the medicinal potency but also the fantastic taste.

LeeBongSun Yakdoraji cultivates balloon flowers above ground in an original and exclusive bag culture system which results in less harm from insects, higher medicinal potency, and overall the best herbal balloon flower roots.

LeeBongSun Yakdoraji does not use herbicides, chemical fertilizers, or organic fertilizers. The growth of native microbes is proliferated with leaf molds to form a natural garden in which LeeBongSun Yakdoraji herbal balloon flowers are grown.

Only organic materials are used. They result in less harm to the plants from insects and other parasites. LeeBongSun Yakdoraji homemade fermented liquid fertilizer is made from sludge leftover from herbal roots processing. This fertilizer increases the immune system of the 10 herbal balloon flowers, helping them to grow stronger and healthier.

Winner of the Global Export Grand Prix_NEW YORK K-HIT BRAND

Global Export Grand Prix

LeeBongSun Yakdoraji herbal balloon flowers grow a larger root head and more numerous rootlets compared to common balloon flowers and thus contain five times the more Saponin.

LeeBongSun Yakdoraji has succeeded in exporting 2.5 million products to the United States and Japan.

New York, the world's economic capital, has selected the highly recognized LeeBongSun Yakdoraji as the Grand Prix.

Natural food that is not a medicine but a cure

Compare HDJ Herbal Balloon Flower Root Extract Juice to the many similar products in the marketplace.

Exclusive HDJ cultivation method means more saponin and other beneficial nutrients!
HDJ only uses 4-years or older roots. Keep healthy with HDJ Root Extract Juice!

Even other herbal balloon flower roots are inferior to HDJ roots!

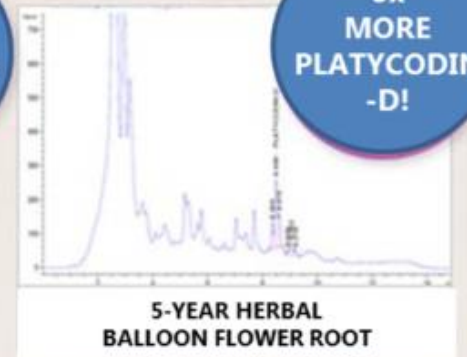

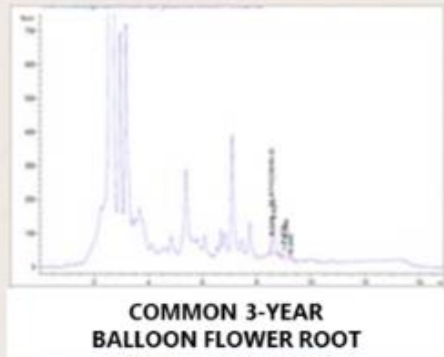

What sets HDJ apart from other edible or herbal balloon flower roots in the marketplace is that we use a special stock of herbal balloon flower, cultivate in an exclusive culture method, and produce roots that have thicker heads and more numerous rootlets. We only use 4-years or older roots that contain more saponin and other beneficial nutrients compared to the traditional products.

LeeBongSun Yakdoraji have more saponin than common balloon flower root

HDJ Balloon Flower Root Test Result

Compare the nutritional value of common and herbal balloon flower roots!

Platycodin-D	5-YEAR HERBAL BALLOON FLOWER ROOT	3-YEAR HERBAL BALLOON FLOWER ROOT	COMMON 3-YEAR BALLOON FLOWER ROOT
nutritional value	493.9 ng/ul	402.4 ng/ul	108.3 ng/ul

- ✓ Compared to common 3-year balloon flower root, 5-year herbal balloon flower root contains about 5 times, and 3-year herbal balloon flower root contains about 4 times more Platycodin-D.
- ✓ Study shows the older the herbal balloon flower gets, the more medicinal nutrition its roots contain - and therefore increases in medicinal value.

Strong recommendations from people who have experienced it

Korean Medicine practitioners stand by Herbal Balloon Flower Root's healing powers.

"Often called gilgyeong, it controls illnesses in the lungs, throat, nose, and chest." - Excerpt from Book of Ancient Korean Medicine, Dried Balloon Flower Root

HDJ Herbal Balloon Flower Roots are special

Grown from the fertile land of Chungnam Yesan-gun, Sap-gyo

SPECIAL HERBAL BALLOON FLOWER STOCK

We use a special native stock that only a few farms treat in Korea to produce the highest quality roots, as opposed to the 3-year-old herbal roots commonly sold in the market.

HIGH SAPONIN CONTENT

HDJ herbal balloon flowers grow a larger root head and more numerous rootlets compared to common balloon flowers and thus contain five times the more Saponin.

What sets HDJ apart from other edible or herbal balloon flower roots is that we use a special stock of herbal balloon flowers, cultivate them in an exclusive culture method, and produce roots that have thicker heads and more numerous rootlets.

We only use 4-years or older roots which contain more saponin and other beneficial nutrients compared to the traditional products.

Common Balloon Flower Root

Common Herbal Balloon Flower Root

HDJ Herbal Balloon Flower Root

HDJ HACCP Certified

HDJ produces only the cleanest and safest, all-natural products certified by HACCP.

HA Hazard Analysis

Analyze possibly harmful microorganisms in ingredients and facilities

CCP Critical Control Point

Control stages where harmful elements can be prevented, eliminated, or reduced

✓ What is HACCP?

Acronym for Hazard Analysis Critical Control Point, HACCP is a standard for food safety and management authentication. HACCP is widely regarded throughout the world as the most effective and efficient food health control system, and many governing bodies, including USA, Japan, European Union, Codex, WHO, and FAO strongly recommend the use of HACCP.

✓ What does Hazard Analysis and Critical Control Point mean?

Hazard Analysis is a process of detecting potentially hazardous elements in food before it reaches the consumer. Critical Control Point refers to a set of standards that must be met with no exception. In other words, HACCP is a system of food safety management that focuses on preventative measures. Ultimately, HACCP is a scientific health control management system that is efficient, systematic, and self-regulatory. At all stages of the food chain, including production, preparation, processing, packaging, distribution, etc., an investigation is made to identify potentially hazardous elements, and control points are formulated to effectively control these elements.

HDJ Safe Manufacturing Plant

Manufacturing, processing, preserving, distribution, and cooking are all carried out under special care in the HACCP certified manufacturing plant, guaranteeing both quality and safety.

Traditional Low-Temperature Decoction Method

As other manufacturers utilize a steam cooking method, HDJ takes a page out of the book of Korean Traditional Medicine to follow a low-temperature decoction method that preserves not only the medicinal potency but also the fantastic taste.

01 Wash

Each ingredient is hand-selected and washed.

02 Prepping

Nutrition loss is minimized by avoiding pulverization.

03 Mix

Dried ingredients first, then other ingredients are added in order of firmness. Finally, pear is added.

04 Heating

Low-temperature decoction method is performed to brew the ingredients and extract a rich flavor.

05 Extraction

Instead of the pressurized extractor, we use the hydraulic ejector to get the most out of the extraction process.

06 Sterilization

We sterilize the juice to make sure it is safe after lowering of the temperature during the extraction process.

07 Packaging

Sterilized juice is placed in pouch packages.

08 Sludge

Remaining sludge is fermented in the farm and used as the best compost and fertilizers.

Exclusive Bag Culture System

HDJ cultivates balloon flowers above ground in an original and exclusive bag culture system which results in less harm from insects, higher medicinal potency, and overall the best herbal balloon flower roots.

Natural Cultivation Method

HDJ does not use herbicides, chemical fertilizers, or organic fertilizers. The growth of native microbes is proliferated with leaf molds to form a natural garden in which HDJ herbal balloon flowers are grown.

Organic Materials and Homemade Fermented Liquid Fertilizer

Only organic materials are used. They result in less harm to the plants from insects and other parasites. HDJ homemade fermented liquid fertilizer is made from sludge leftover from herbal roots processing. This fertilizer increases the immune system of the herbal balloon flowers, helping them to grow stronger and healthier.

Herbal Platycodon
Ingredient Analysis

▶ 도라지는 상업적으로 활용 가능한 다양한 사포닌을 보유한 것으로 보고 됨

Platycodon is reported to contain a variety of saponins which gives it market value

Platycodon Saponin	Effects
Platycodin A	항비만, 고지혈증개선, 콜레스테롤감소, 글루탐산유도독성으로부터 신경세포보호, 이차지질분해효소억제 Reduce obesity, improve hyperlipidemia, reduce cholesterol, protect nerve cells from GABA mediated toxicity, suppress pancreatic lipase
Platycodin C	글루탐산유도독성으로부터 신경세포보호, 이차지질분해효소억제 Protect nerve cells from GABA mediated toxicity, suppress pancreatic lipase
Platycodin D	항암, 항염,면역증진, 멜라닌생성억제, 글루탐산유도독성으로부터 신경세포보호, 이차지질분해효소억제 Anticancer, anti-inflammation, suppress production of melanin, protect nerve cells from GABA mediated toxicity, suppress pancreatic lipase
Platycodin D2	B형 간염에 대한 항원반응 증진, 면역보조제제(adjuvant)로 사용가능 Promote antigen response against hep-B, useable as adjuvant
Platycodin D3	염증개선효과,항비만, 고지혈증개선,콜레스테롤감소 Improve inflammation, anti-obesity, improve hyperlipidemia, reduce cholesterol
Polygalacin D	항비만, 고지혈증개선, 콜레스테롤감소 Anti-obesity, improve hyperlipidemia, reduce cholesterol
Polygalacin D2	해마의 허혈성손상 복구에 도움 Effective in recovery after hippocampal ischemia damage
Platycoside B,C,E,J,E,O,M-3	항암, 알츠하이머,소아비만에 효과 Anticancer, anti-Alzheimer's, anti-childhood obesity
N platyconic acid B lactone	암세포의 증식억제 Suppress cancer cell reproduction
deapio-platyconic acid B lactone	암세포의 증식억제 Suppress cancer cell reproduction
Pltyconic acid A	2형당뇨 개선 Improve type 2 diabetes
deapio-platycodin D	글루탐산유도독성으로부터 신경세포보호,이차지질분해효소억제 Protect nerve cells from GABA mediated toxicity, suppress pancreatic lipase
deapio-platycodin D2	암세포의 증식억제 Suppress cancer cell reproduction
platycodigenin	과산화아질산염 제거 - remove peroxynitrite
polygalacicacid A,B,C	항균 - antibacterial
3-O-B-glucosylplatycodigenin	항염증 - anti-inflammatory

Platycodin D

- 혈구암세포주의 생존율 감소, 증식억제 등의 세포자살 유도 ([Sang Eun Park et al. 2013](#))
- Decrease survival rate of cancer cells in the blood stream - promote growth inhibition and apoptogenic activity
- 직접적인 세포독성효과 , 암세포의 세포자살 증가 , 면역력 촉진, 암으로인한 체력쇠약상태(악액질)의 조절 등을 통해 폐암세포에 대한 항암력을 가짐. (Jae chan Park et al. 2014) (pubmed: [25477992](#))
- Contain anti-cancer properties against lung cancer cells - cytotoxicity effects, increase cancer cell apoptogenic activity, improve immune system, help with weakened state from cachexia in cancer patients
- 항산화능력으로 oxLDL 유도발현을 억제하고 항염증 효과 및 항죽상경맥동화증을 가짐 (Jingtao Wu et al. 2012) (pubmed : [22863916](#))
- Suppress oxLDL induced expression through antioxidant property, contains anti-inflammatory and anti-atherosclerosis properties
- 알레르기성 피부염에 플라티코딘 D 함유 도라지 추출물이 효과를 나타냄 ([박세진 외. 2012](#))
- Platycodin D in platycodon extract shows effectiveness against allergic dermatitis
- 항염증, 황산화작용, 면역조절기작을 통해 류마티스관절염에 효과를 나타냄 ([O. Gon Kwon et al. 2014](#))
- Effective against rheumarthritis through anti-inflammatory, anti oxidative, and immune boosting properties
- 멜라닌생성을 억제하며 피부에 대한 부작용이 없다고보고되어 있으며 피부미백화장품에 주로 사용됨
- Suppress melanin production, Known to be without dermal side effects, Used mainly in skin tone whitening cosmetics
- 플라티코딘 D 대량 추출법 특허(화장품활용가능한) 10-2014-0011663 , 미백화장품관련 특허 10-0901519
- Large amount platycodin D extraction method (for cosmetic purposes) Patent 10-2014-0011663 , Whitening Cosmetic Patent 10-0901519

HDJ KOREA

LeeBongSun Yakdoraji English catalog

7 years spent with Mother Nature To bring to you nature's health and wisdom!

The last seven years of my life dedicated to harvesting herbal balloon flowers have been a rough journey. I worked tirelessly and invested countless hours to studying and making improvements on the plants - to make sure my product was the best balloon flower root that nature has to offer.

Despite all the ridicule and dismissal at the lack of profitability, I stayed true to my convictions about these special herbs and finally succeeded in producing roots of the highest quality through a unique harvesting method.

HDJ balloon flowers are produced from a stock of herbal platycodons that grow to have bigger heads and more numerous fine roots, and our balloon flower root contains more saponins and other key nutrition than the average balloon flower root on the market.

They are also treated with the same traditional Korean medicine treatment method passed down from our mothers to ensure that its taste and herbal efficacy is preserved.

Going forth, HDJ will continue striving to bring you the best herbal balloon flower root products in the world. We wish you best of health in the times to come.

President of Handoraji Agricultural Association Corporation

Bongseon Lee

From the fertile land of Sappgyo, Yesan-gun, Chungnam Province 7 BENEFITS OF HDJ BALLOON FLOWER ROOTS

- 01 **SPECIAL STOCK OF HERBAL BALLOON FLOWER ROOTS** Unlike products on the market that use 3 year old edible roots, we use a 4 years-and-older special native stock of the highest quality that are only found in a handful of farms throughout the country.
- 02 **HIGH SAPONIN CONTENT** With a bigger head and more numerous fine roots, HDJ balloon flower root contains 5 times more saponins than the average balloon flower root on the market.
- 03 **TRADITIONAL LOW TEMPERATURE COOKING METHOD** The average balloon flower root on the market is steam processed, while HDJ herbal balloon flower root is processed through the low temperature cooking method of traditional Korean medicine to ensure not only its herbal efficacy, but also its pleasant taste.
- 04 **EXCLUSIVE BAG CULTURE METHOD** Bag culture method of HDJ, a method of cultivating produce above ground, results in less insect damage and higher herbal nutrition.
- 05 **ORGANIC CULTIVATION METHOD** We do not use herbicides, chemical fertilizers, or organic fertilizers. By using leaf molds we encourage growth of indigenous microbes for the most natural of cultivating methods.
- 06 **SELF-PRODUCED FERMENTATION FOR LIQUEFIED FERTILIZER** Left over sludge from balloon flower root juice production is fermented for liquefied fertilizer. This fertilizer raises the immune system of the herbal balloon flower plants for healthier growth.
- 07 **HDJ PRODUCTION FACILITY** From cultivation to processing, all aspects of production are handled at our very own HACCP-verified production facility, ensuring meticulous quality control.

Regional Special Produce Carefully Grown and Selected

THE MAIN INGREDIENTS OF HDJ BALLOON FLOWER ROOT JUICE

-  **Herbal Balloon Flower Root**
Compared to the market balloon flower root, HDJ herbal balloon flower root contains five times more saponins, which is known for its anticancer and anti-inflammatory properties. As an alkalinizing health food, HDJ balloon flower root also contains plenty of Vitamin A, Vitamin C, calcium, iron, minerals, and fiber.
-  **Pear**
The pear is fruit known to relieve the body and the mind of fatigue, as well as to help discharge bodily waste. The ancients practiced boiling up pear and balloon flower root in water to make tea during colder seasons to alleviate coughing and phlegm build up. The warm properties of the balloon flower root and the cold properties of the pear coming together is what increases the herbal efficacy many folds.
-  **Balsam Pear**
The balsam pear, or bitter melon, also known as Momordica charantia L., is a fruit of longevity. It contains Vitamin C, beta carotene, calcium, iron, and dietary fiber. The charantin, which acts as natural insulin, is also recognized as a good controller of blood sugar level.
-  **Sword Bean**
The sword bean is known in Korea as 'beef that grows in the field,' because of Concanavalin A, a type of protein that the sword bean contains in plenty. It also has more Vitamin A, B, B3, C, calcium, magnesium, fiber, and many more nutrients compared to other types of beans.
-  **Sponge Gourd**
High in water content and dietary fiber, the sponge gourd is a low calorie food that is filling in the stomach and good for controlling appetite and cholesterol, as well as helping with constipation. Its high concentration of saponins and quercetin helps coughing and phlegm build up and supports skin ageing prevention.
-  **Salvia plebeia R. Br.**
Salvia plebeia R. Br., better known as savoy cabbage, is full of saponins, flavonoids, and unsaturated fatty acids that are good for strengthening the immune system, boosting the effects of Vitamin C in the body, fighting bacteria, and purifying the blood.
-  **Jujube**
In traditional Korean medicine the jujube is known to have warm properties that calm the stomach, protect the intestines, and aid blood flow. It also improves rhinitis symptoms, spring allergy symptoms, and lung health.

Nature's taste and goodness fully preserved - HDJ Balloon Flower Root products make great gifts!

HDJ balloon flower root is the highest quality of its kind, as its large head and numerous fine roots indicate.

A cup in the morning and evening for a boost in your immune system - Herbal Balloon Flower Root Juice

HDJ Balloon Flower Root Premium Juice 50 pack

HDJ Balloon Flower Root Premium Juice 30 pack

HDJ Balloon Flower Root Special Juice 50 pack

HDJ Balloon Flower Root Special Juice 30 pack

HDJ Balloon Flower Root Health 30 pack

HDJ Great Balloon Flower Root Pear 30 pack

Recommended to:

Children with constant colds and flus / Elderly with chronic coughing and phlegm build up / Those with weakened immune system in colder seasons / Those suffering from rhinitis / Those suffering from respiratory illnesses

HDJ Herbal Balloon Flower Root Juice is pleasant to the taste and enjoyed by both adults and children. It is more effective to heat up the juice and take slow, small sips.

LeeBongSun Yakdoraji Fresh Flower Mask Catalog

Golden Essence

TURN BACK THE TIME ON YOUR SKIN WITH THE MIRACLE OF GOLD THERAPY!

HDJ Fresh Flower GOLD Mask

- ✓ Brightening
- ✓ Nourishing
- ✓ Strengthening

Gold Therapy, the beauty secret of Queen Cleopatra captured into highly concentrated triple-layered foil sheet facial mask, will transform your skin before your very eyes.

HOW TO USE

- 1 Cleanse your face.
- 2 Apply the mask with the golden side facing in and the black side facing out.
- 3 After 15 to 20 minutes, gently remove the sheet and massage remaining serum into skin.

Real Moisture

POWERFUL FORMULA FOR GLOWING SKIN AND UPLIFTED CONFIDENCE!

HDJ Fresh Flower AQUA Mask

- ✓ Moisture Coating
- ✓ Luster Coating
- ✓ Soothing Effect

Healing energy of the ancient herb is captured into high concentrate for the best facial moisture mask. Revitalize your dry and irritated skin for the richest, most moist, and beautiful one.

HOW TO USE

- 1 Cleanse your face.
- 2 Apply the mask with white side of the sheet facing toward your face.
- 3 After 15 to 20 minutes, gently remove the sheet and massage remaining serum into skin.

Special Care 1.

TRIPLE-LAYERED FOIL SHEET

World's first!
Both sides of the sheet is specially manufactured with foil.
They allow serum to be transferred into skin in gradual amounts -
With none going to waste.

- Luxurious design of rose-patterned gold sheet
- Fabric that adheres comfortably to skin
- Ability to deliver 28g - more than enough serum - to the attached skin
- Ability to hold in moisture and transfer serum for longer, as foil in the outer layer prevents evaporation

Other Sheets

HDJ Foil Sheet

Special Care 2.

PREMIUM CARE

HIGHEST QUALITY BALLOON FLOWER ROOT 5% EXTRACT

Korea's best herbal balloon flower roots fermented and extracted.
Whopping 5% of serum comprising of the herb.
Saponins in the herb suppress melanin production.
Anti-oxidant and anti-inflammatory properties help brighten and strengthen the skin.

THE GOLD THERAPY EFFECT

The beauty secret of Queen Cleopatra -
Lavish your skin with health and beauty through Gold Therapy.

28g OF ABUNDANT SERUM

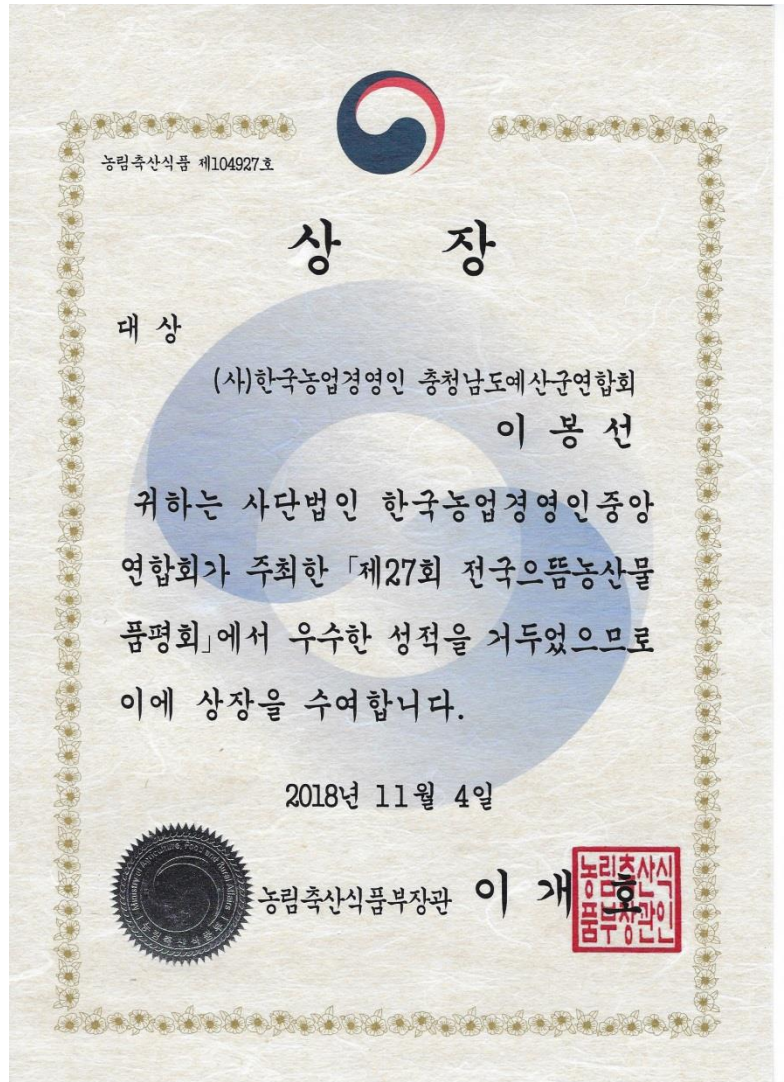

A whole bottle of serum is poured into a single sheet for maximum benefit of nutrition.
Skin is rejuvenated as elasticity, glow, and vibrant complexion returns.
Experience the most luxurious skin care with a single sheet of HDJ Facial Mask.
